

# Grattons Park Gatwick River Restoration

Project:

## Grattons Park River Restoration Scheme - Landscaping

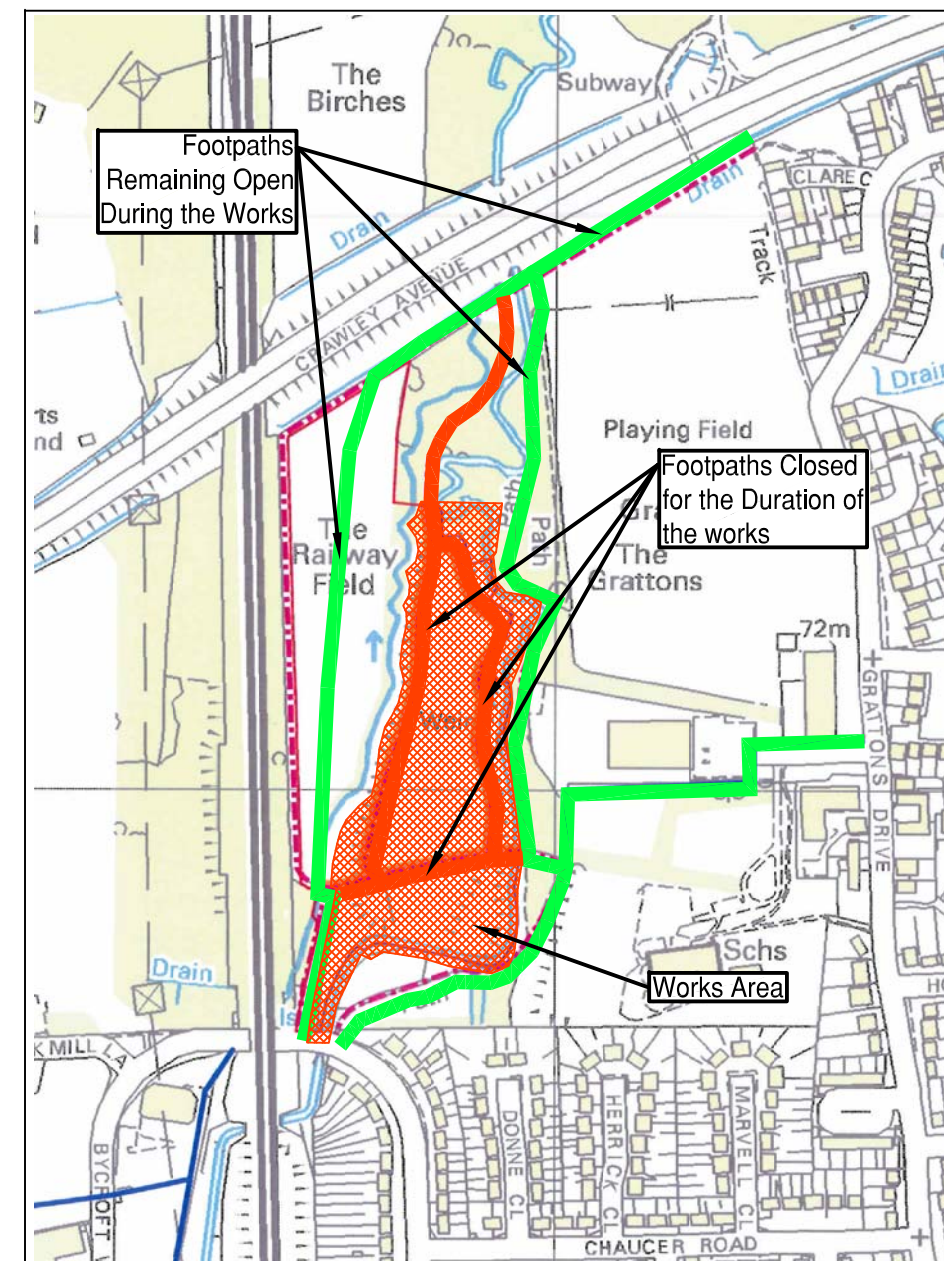

Works to be Carried out in  
**Spring 2014**

The main Engineering works to the Grattons Park River Restoration Scheme are now complete and the new River Channel is establishing itself prior to the final landscaping which will be carried out in early spring 2014.

Until the landscaping and grass seeding is completed and fully established the main site will remain closed in the interest of public safety and to allow for the reinstatement and establishment of the grass seeding.

The main car park will be fully open but the footpaths passing through the site will remain closed with the alternative routes shown on the adjacent plan.
